# GROWING RELIABILITY THREATS

BY JIM MATHESON

American families and businesses expect the lights to stay on at a cost they can afford.

But that's no longer a guarantee. Nine states saw

rolling blackouts last December as the demand for electricity exceeded the available supply.

This is no longer a theoretical conversation. And unless policymakers change course, it's going to get worse.

## Warnings and challenges mount

In May, the Environmental Protection Agency (EPA) proposed a rule to regulate power plant emissions. This proposal will further strain America's electric grid and undermine decades of work to reliably keep the lights on across the nation. It's just the latest instance of EPA failing to prioritize reliable electricity as a fundamental expectation of American consumers.

It shouldn't have to be this way. When you find yourself in a hole, the first thing to do is stop digging. But instead of putting down the shovel, EPA wants to bring in an excavator.

But don't just take my word for it. Warnings about the threat of reliability challenges have snowballed in recent months. The 2023 North American Electric Reliability Corporation (NERC) summer reliability assessment recently highlighted that more of the country is at risk of blackouts than last year. NERC says that the EPA proposal will accelerate the reliability challenges.

In May, several Federal Energy Regulatory Commission leaders warned the U.S. Senate about threats to reliable electricity. In March, Manu Asthana, who is the CEO of PJM Interconnection – a regional transmission organization that coordinates the movement of wholesale electricity in 13 states –

said that the regional transmission organization needed to slow the pace of generation retirements to avoid reliability problems by the end of the decade.

## Voicing reliability concerns

America has a reliability problem. With the help of co-op leaders across the nation, the National Rural Electric Cooperative Association has been a leading voice in sounding the alarm on reliability. Today's energy decisions will determine if there are sufficient resources to keep the lights on tomorrow. Five issues are impacting the reliable delivery of electricity across the nation.

- 1 Increasing demand for electricity as other sectors of the economy are electrified.
- 2 Decreasing electricity supply due to the disorderly retirement and insufficient replacement of existing generation.
- 3 Permitting delays that prevent new electric infrastructure from being built and connected to the grid.

4 Supply chain challenges.

5 Problems with natural gas availability.

## Commitment to member-consumers

None of these challenges will be easy to address, but we can start by asking ourselves these questions:

- Is this what America is supposed to be?
- Should the threat of rolling blackouts be a permanent facet of U.S. energy policy?

The answer to both of those questions is a resounding no for electric co-ops and the communities we serve.

The long-term solution requires policymakers and regulators to recognize the need for time, technology development and new transmission infrastructure. These are the essential ingredients for an energy future that prioritizes reliable electricity for all consumers, including the 42 million Americans served by electric cooperatives.

*Jim Matheson is the CEO of the National Rural Electric Cooperative Association.*

## EDITOR'S CHOICE CONTEST

# Win a grilling package!

July is National Grilling Month! To celebrate, we're giving away a beef bundle, including \$50 in beef certificates, a cast iron skillet and additional summer grilling essentials, courtesy of the Iowa Beef Industry Council.

## Visit our website and win!

Enter this month's contest by visiting [www.ieclmagazine.com](http://www.ieclmagazine.com) no later than July 31. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified. The winner of the \$100 local nursery gift card from the May issue was Phillip Boehnke, Prairie Energy Cooperative.

ENTER ONLINE BY JULY 31!

# THE VALUE OF OUR COOPERATIVE PARTNERSHIPS

BY JIM GOSSETT

Several Raccoon Valley Electric Cooperative (RVEC) employees recently participated in a tabletop training on cybersecurity. The exercise took us through a scenario where our operations system failed, and we discussed how to recover, communicate and minimize the impact of a cyber-related incident on our co-op membership.

The exercise was conducted by the safety and loss control department of the Iowa Association of Electric Cooperatives (IAEC). This got me thinking about the variety of services the state association provides to RVEC for the ultimate benefit of our member-owners. Like RVEC, IAEC is a member-owned cooperative.

Until recently, former RVEC board member Steve Seidl was the president

of the IAEC board of directors. Our co-op has a say in how IAEC is governed and operated, just like our member-owners have a say in how RVEC is governed and managed. IAEC provides education and training, communications, state and national legislative advocacy, and regulatory affairs consulting. It also sponsors RVEC's health care plan, among many other services.

### Other valuable industry relationships

RVEC is a member-owner of Federated Rural Electric Insurance Exchange, with a structure that is like a cooperative. Federated provides beneficial safety programs, including a S.A.F.E. app in each truck that assists our line crews in logging job site briefings and more.

The Rural Electric Supply Cooperative (RESCO) is our primary supplier of transformers, poles, wire and other equipment and materials.

Our purchasing relationship with RESCO allows for better priority service after a storm, as well as a return of patronage dividends, just like you have been receiving as a member-owner of RVEC.

RVEC is a member-owner and 100% borrower from the Cooperative Finance Corporation (CFC). In addition to financial products, CFC services include strategic planning and key performance indicators to compare RVEC with other cooperatives around the country. They have some of the best board and employee education and training opportunities available.

### Relationships benefit RVEC and our members

We all benefit from the solid relationships with these cooperatives. These partnerships and services enable RVEC to safely serve you with reliable, affordable and responsible electricity.

*Jim Gossett is the CEO of Raccoon Valley Electric Cooperative.*

## ATTEND YOUR ANNUAL MEETING

When you signed up to receive service as a Raccoon Valley Electric Cooperative (RVEC) consumer, you automatically became a member and a part-owner of our cooperative.

Cooperatives use a business model that's different from other companies. We don't sell stock on Wall Street, so there are no out-of-town investors. Control of your cooperative is local.

All member-owners may run for a seat on our board of directors. You may vote for the candidates who do run – and know that every candidate is also an RVEC consumer.

Attending your cooperative's Annual Meeting on Sept. 6 is important. It's a great opportunity to meet the CEO and co-op staff. You can get to know the directors who advise the staff and decide on important policy matters. It's also where you can vote for the board of directors and learn what business issues impact RVEC.

Membership in your cooperative comes with privileges. It also comes with the responsibility of casting your vote for the directors you think will do the best job in leading our co-op.

# WHY MEMBERSHIP MATTERS

You could be a member of a lot of different places: a gym, a 4-H club, a food-of-the-month club – the list goes on and on! But what makes being a member of a co-op different? The simple answer is that when you are a co-op member, you are also an owner.

You own a stake in our business, and just like any stakeholder, there are many benefits to your membership. As a member-owner of Raccoon Valley Electric Cooperative, you

have a say in the representatives who are elected to serve on the co-op's board of directors. You have an opportunity to make your voice heard every year at our Annual Meeting, which will be held Sept. 6 this year.

You get a say on policy issues your electric cooperative supports or opposes. You can even help to determine how your profits are redistributed. Our bottom line is providing you with safe, reliable and

affordable electricity. While we must think about expenses, overhead and other aspects of daily business, when we have money left over, we send it back to you. And returning capital credits is a major part of why being a co-op member matters.

As your local electric co-op, we are part of this community. When we think about membership, we think about all the ways we can give back to you, our member-owners – and that is what matters most to us.

## NOMINATING COMMITTEE APPOINTS DIRECTOR CANDIDATES

The Nominating Committee's responsibility is to select director candidates from each of the districts in which directors' terms expire. The following members of the cooperative were nominated for the office of director for the term specified to be voted on at the Annual Meeting to be held on Sept. 6.

### **DISTRICT 4**

**David Onken**

### **DISTRICT 7**

**Karen Werner  
Craig Corderman**

Twenty or more members may make other nominations in writing over their signatures, not less than 45 days prior to the Annual Meeting date of Sept. 6. The secretary shall post such nominations at the same place where the list of nominations made by the committee is posted.

# MEET IOWA'S ATTORNEY GENERAL

BY ANN FOSTER THELEN

Editor's Note: As a non-partisan publication, we profile government officials from time to time to help our readers get to know these important Iowans and to understand how their roles impact rural Iowa.

In November 2022, Iowans elected Brenna Bird as their next Attorney General – the first Republican to hold the office

since 1979. Before becoming Iowa Attorney General in January 2023, Bird served as a prosecutor for six years, first as the Fremont County Attorney and then since 2018 as the Guthrie County Attorney.

Born and raised on a farm in Guthrie County, where she was homeschooled, Bird graduated from Drake University and received her J.D. from the University of Chicago Law School.

We sat down with Bird in June to learn more about her perspectives and priorities on various topics in her new role serving Iowans.

## **Q: Tell our readers more about your background and family.**

I grew up east of Dexter, and we had corn, soybeans, cattle and farrow-to-finish pigs. My husband, son (who is 6 years old) and I live on what was once my grandpa's farm – where my dad grew up – and in the house my grandpa built in rural Dexter.

My husband Bob is an Iraq War veteran. He is also a lawyer and works in the Iowa State Senate. Over the years, my legal career has included working in private practice, in Congress in Washington, D.C., as legal counsel for Gov. Branstad and then Lieutenant Gov. Reynolds. I've served as the county attorney in Audubon, Fremont and Guthrie counties.

## **Q: Over the years, how have you been involved in your community/state or other activities? What are your hobbies?**

Beyond professionally, one of the ways I've been most involved in the

community is through our church and the local activities that our parish gets involved in. The strength of our rural communities is one of Iowa's best assets. We are good at working together and solving problems. I enjoy reading, cooking, gardening, quilting, bicycling and spending time with family.

## **Q: How has agriculture shaped who you are today?**

My family has been involved in agriculture for generations. In fact, my brother is a seventh-generation farmer. Growing up in agriculture taught me to stick to things even when they get tough and keep trying and working hard.

Like many Iowa families, we learned through the farm crisis that people matter more than possessions. From firsthand experience, I know that Iowa farmers care more about the land than anyone else and support good conservation practices.

**Q: What are some topics that you are passionate about that impact rural Iowa/lowans?**

One area is pushing back against the federal government in court when they go too far with federal overreach. An important example for Iowa is the Waters of the U.S. rule, which would allow the Environmental Protection Agency to control 97% of Iowa farm ground and other lands. We've challenged the rule and have received some favorable rulings to stop it, but we're still litigating that through court. That's very important because it could change agriculture in rural Iowa as we know it. We need to keep decision-making local and out of D.C.

I'm also passionate about supporting and maintaining strong law enforcement. An alarming trend is the infiltration of drugs into rural Iowa. In every county in the state, it's important to keep our communities safe.

**Q: As a member of Guthrie County REC, what are your thoughts/perspectives on the cooperative business model?**

The cooperative business model works well. Initially, electric cooperatives brought power to rural Iowa, including where I live. It's essential to have affordable and reliable electricity. Because of its local ownership structure, cooperatives excel with customer service, responsiveness and community engagement. The co-op business model is even more relevant today than ever before.

**Q: What personal and professional accomplishments are you most proud of?**

Personally, it's being a wife and mom. I worked full-time to pay for college. I learned a lot serving in different roles in the Governor's office and Congress. Then, starting my law firm while also working as a county attorney.

Regarding my accomplishments as a prosecutor, I think the best part of the job was working with law enforcement because they're heroes with good hearts. People don't see all the things that law enforcement does daily and the compassion and bravery they bring to the job. Working to enforce the law to keep our communities safe and helping crime victims is rewarding.

**Q: What excites you the most about being Iowa's Attorney General?**

Having the opportunity to make Iowa safer, support our law enforcement and push back against the federal government when they go too far.

**Q: What is another top priority that you are working on?**

We're here to serve lowans. If someone falls victim to a scam or thinks something might be suspicious, we want them to reach out to our office.

Last year, we were contacted by a woman who received a scam call and was told that she had a fraudulent Amazon charge for thousands of dollars on her account. The scammer convinced her they would help cancel

the payment. They claimed her account showed unusual activity in other states, that she had become a victim of ID theft, and that her information was used to commit a crime. The scammer impersonated law enforcement and informed her to protect her assets, she needed to send a box with \$20,000 in cash to California. The day after she shipped the money, she realized she had been scammed and contacted the Iowa Attorney General's office. Our team was able to stop the shipment and return the money to this woman.

*Ann Foster Thelen is the editor of Iowa Electric Cooperative Living.*

See Page 14 for tips on protecting yourself against utility scams.

*Brenna Bird with her husband Bob and their son.*

# Vegetable

## RECIPES

### for summer

## SWEET AND SOUR GREEN BEANS

- 4 slices of bacon
- 3 tablespoons brown sugar
- flour, optional
- 3 tablespoons vinegar
- 1 pint green beans

Fry bacon, drain and crumble. Put brown sugar in pan, stir in flour thickener if desired. Add bacon, vinegar and beans and heat through. *Serves 2*

**Allyson Bailey • Hamilton  
Chariton Valley Electric Cooperative, Inc.**

## MICROWAVE SUCCOTASH

- 1 16-ounce bag frozen corn
- 1 16-ounce bag frozen lima beans
- ¼ cup water
- 1 14.5-ounce can diced tomatoes
- ½ teaspoon garlic powder
- ¼ teaspoon smoked paprika
- ¼ teaspoon thyme, dried
- 1 teaspoon parsley, dried
- 1 teaspoon salt
- ⅓ cup sweet onion, finely chopped
- 1 tablespoon butter

In a 2.5-quart microwave-safe bowl with lid, mix corn, lima beans and water. Microwave on high for 10 minutes. Let bowl sit in microwave covered. In a separate bowl, combine tomatoes, garlic powder, paprika, thyme, parsley and salt. Mix well and set aside. Sauté onions in butter until clear. Add to bowl of tomatoes and spices, mix well. Combine tomato mixture with corn and lima beans. Thoroughly stir together. Microwave on high for 2 minutes or until hot. *Serves 6*

**Jacque Minikus • Pisgah  
Harrison County Rural Electric Cooperative**

## EASY SCALLOPED POTATOES

- 2½ cups milk, heated
- 3 tablespoons flour
- 1½ teaspoons salt
- 6 medium potatoes, peeled and thinly sliced
- 3 tablespoons butter, plus enough to coat casserole dish
- pepper, optional

Stir the milk, flour and salt together. Layer in a buttered casserole dish alternating potatoes and milk mixture. Top with 3 tablespoons butter and season with pepper, if desired. Bake at 350 degrees F for 60-75 minutes or until the potatoes are tender. *Serves 8-10*

**Elinor Moeller • Tripoli  
Butler County Rural Electric Cooperative**

## LOTTA (LOW-TAH) FINNISH VEGGIE CASSEROLE

- 5 potatoes, sliced
- 4 carrots, sliced
- salt, to taste
- pepper, to taste
- 1 onion, sliced
- 1 beet, sliced
- ½ pound salt pork, preferably frozen
- ⅓ cup water

In a medium-sized roaster or Dutch oven, place a layer of potatoes followed by a layer of carrots. Season with salt and pepper to taste. Add a layer of onions followed by a layer of beets, salt and pepper. Repeat the vegetable layers one more time. Slice salt pork ¼-inch thick and approximately ½-inch wide, frozen pork is easier to cut. Place salt pork on top of vegetables and add water. Place under the broiler to cook salt pork until crispy brown. Cover roaster and cook at 400 degrees F for 50 minutes. *Serves 6*

**Michele Dirks • George • Lyon Rural Electric Cooperative**

## INFINITY CABBAGE SALAD

- ¼ cabbage, shredded
- 1 cucumber, thinly sliced, optional
- ½ carrot, thinly sliced, optional salt, to taste
- 1 tablespoon soy sauce
- 1 teaspoon sugar
- 2 teaspoons apple cider vinegar
- 2 teaspoons sesame oil
- 1 tablespoon sesame dressing, optional
- 1 teaspoon sesame seeds

Put the shredded cabbage in a colander. If desired, add cucumber and carrots. Sprinkle with salt, mix well. Set aside for 5-10 minutes. Meanwhile, create a dressing by mixing soy sauce, sugar, apple cider vinegar and sesame oil. Add sesame dressing, if desired. Squeeze vegetables to drain excess water. Pour dressing over vegetables and sprinkle with sesame seeds. *Serves 3*

Erina Westphal • Guthrie Center  
Guthrie County Rural Electric Cooperative Association

## EGGPLANT CASSEROLE

- 1 small eggplant
- 3 tablespoons cooking oil salt, to taste pepper, to taste
- 1 medium onion, chopped
- 1 small green pepper, chopped
- 2 medium tomatoes, sliced medium thickness
- ¼ cup American cheese, grated

Peel eggplant and slice about ¾- to ½-inch thick. Cut slices in half. In a large frying pan, heat oil until starting to smoke. Place eggplant in hot oil and brown each side. Season with salt and pepper to taste. In a 2-quart baking dish, alternate layers of eggplant, onion, green pepper and tomatoes. Cover and bake at 375 degrees F for 50 minutes. Remove cover and sprinkle grated cheese on top. Return to oven and bake uncovered until cheese is melted and browned. *Serves 4*

Greg Flugum • Forest City  
Prairie Energy Cooperative

## GOOD CARROTS

- 8 cups carrots, peeled and sliced
- ¼ cup onion, chopped
- 1 cup plus 4 tablespoons butter, divided
- 1 pound Velveeta
- ½ cup brown sugar
- 2 cups crackers, crushed

Steam and drain carrots and onions. Place in 9x13-inch pan. Melt 1 cup butter with Velveeta. Mix in brown sugar and pour over carrots. Mix crackers and 4 tablespoons melted butter, sprinkle over top. Bake at 350 degrees F for 20-25 minutes. *Serves 6*

Lizzy Hartter • Rock Rapids  
Lyon Rural Electric Cooperative

## ONION PIE

- 1 cup soda crackers, crushed
- ¼ cup margarine, melted
- 2 cups onion, sliced
- 2 tablespoons margarine
- ¾ cup milk
- 2 eggs, beaten
- ¾ teaspoon salt pepper, to taste
- ¼ cup sharp cheddar cheese, shredded
- parsley, to taste, chopped

Mix crackers and ¼ cup melted margarine. Press into an 8-inch pie pan on bottom and up the sides. Cook onions in 2 tablespoons margarine until tender, not brown. Place onions in pie pan. Combine milk, eggs, salt and pepper, then pour over onions. Sprinkle with cheese and a little chopped parsley. Bake at 350 degrees F for 30 minutes, until custard is set. Serve hot. *Serves 8*

Truman Nester • Rock Rapids • Lyon Rural Electric Cooperative

## BAKED ZUCCHINI CASSEROLE

- 1 pound ground beef
- ¼ cup onion, chopped
- ½ cup green pepper, chopped
- 1 cup cracker crumbs salt, to taste pepper, to taste
- 1 can cream of mushroom soup
- 2 eggs, beaten
- 1 large zucchini, cubed (or 2 small) bread crumbs for topping

Brown beef and onion. In large bowl, mix beef and onion with green pepper, cracker crumbs, salt, pepper, soup, eggs and zucchini. Place mixture in a greased 9x13-inch pan. Top with bread crumbs and bake at 350 degrees F for 35-40 minutes.

# A TRIP OF A LIFETIME DELORES FAGLE THOM RECALLS EXPERIENCE ON 1958 YOUTH TOUR

BY JENNIFER ACHENBACH

Sixty-five years ago, Delores (Reed) Fagle Thom stepped on a bus headed to Washington, D.C., for the first-annual Rural Electric Co-op Youth Tour.

It was a trip that would leave a lasting impression on the recent high school graduate.

At the time, Delores was working at the Iowa State University Extension Office in Independence. As a member of the Buchanan County Rural Electric Cooperative, her boss suggested she complete the application for the tour, writing an essay about why she wanted to be chosen. She was one of the over 30 participants from Iowa selected to go to D.C. in 1958. As a recent Independence High School graduate, Delores was engaged to Dwaine Fagle. In her words, she thought that if she was going to go on a trip like this, she better go before she was married.

On June 14, Delores got on a bus headed to D.C., her first time visiting the nation's capital. The group spent the night in Toledo, Ohio, before arriving in D.C. the next evening. They stayed at the Arva Motor Hotel in Arlington, Virginia.

## **Impactful lineup of tours and conversations**

The first day of the trip, the group had breakfast with members of the Iowa Congressional Delegation, followed by a tour of the U.S. Capitol, led by Sen. Thomas Martin. That was followed by a tour of the Library of Congress, visiting both the House of Representatives and Senate, as well as the Supreme Court Building. Delores recalls the time she spent visiting with her local delegates, as well as posing as a group on the Capitol steps.

On June 17, participants visited the National Rural Electric Cooperative Association (NRECA) building, followed

by a visit to the Bureau of Printing and Engraving and the Department of Justice.

Activities the next day included touring the Rural Electrification Administration headquarters at the United States Department of Agriculture (USDA), viewing the Washington Cathedral and touring the USDA Research Center in Beltsville, Maryland.

June 19 holds a special place in Delores' memory. That was the day participants got a special tour of the White House.

After the White House tour, the group visited the Washington Monument, including an elevator ride to the top. Next, they

went to the Smithsonian Institute and finished the night with a trip to Glen Echo Amusement Park. On the final full day of the trip, they toured Arlington National Cemetery, Tomb of the Unknown Soldier and Lee's Mansion, then concluded the visit with a tour of Washington's home at Mt. Vernon.

After five days of learning about government, the group got back on the bus to Iowa on Saturday, June 21. They spent the night in Chicago. Delores recalls feeling a little scared as their hotel room didn't have a lock on the door.

Despite the full schedule of activities, there was also a lot of fun and bonding with her fellow participants.

"We stayed in a motel room with four of us to a room. We filled the bathtub with ice cubes and put watermelon in it. We invited a few people to our room, and we had a watermelon treat," she remembers.

When she returned to Iowa following the tour, Delores presented what she'd learned to her co-op.

**The next chapters of life**

What started as a trip before settling down turned into an experience that shaped the rest of her life. Delores and Dwaine got married the following year. They lived in Independence, then Dewar and Sumner, before settling onto their farmstead three miles west of Fayette. There, the couple raised seven children while operating their dairy farm.

In 1986, Delores decided it was time to go to school and pursue her passion. She started taking accounting classes at Northeast Iowa Community

College (NICC) in Calmar. She finished her degree in 1987 and opened Delores Tax and Accounting. For over 30 years, Delores has built her business, at times with more than 200 tax clients a year, in addition to her accounting jobs.

"I just love it," she says, noting she now has cut back on her tax work but stays busy year-round with accounting. She was recognized by the governor for 25 years of work in 2013. She also was named a 2017 NICC Alumni Shining Star.

Dwaine passed away in 1996 from cancer. After a second marriage, Delores found love with her high school sweetheart, Bill Thom. Delores had reached out to Bill after the death of his wife. Six years later, Bill contacted Delores and they struck up a relationship. The two married. They later divorced but remain in touch today. Delores now resides in Fayette, just three miles from where she and Dwaine farmed.

**Fond memories and advice for future participants**

Although it's been well over half a century since Delores was on the Youth Tour, she still has fond memories of the trip.

Delores is excited for future Youth Tour participants to experience the thrills she had.

"Make it a learning experience because there's a lot to learn, but still enjoy the time that you're there," she says. "It was a good experience for me, a good learning experience."

# VACATION USAGE: YOUR METER DOESN'T STOP WHILE YOU'RE AWAY

Vacation season is upon us, and you may be traveling to see the sights and sounds of our great country. And while you are gone for a couple of days or weeks, your electric bill will surely go down, right? Wrong.

Many people believe their electric consumption decreases or stops when they are gone. In reality, most electric appliances are still running unless you have taken measures to shut them off. Here are some questions to ask yourself if you want to save energy while you're away.

- **Did you shut off the electric water heater?** If not, it will still run to maintain the temperature that you have the thermostat set.
- **Are the refrigerator and freezer emptied and turned off?** These appliances will continue to run if not.
- **Did you shut off your clocks, computers, dehumidifiers, air conditioner, lights, TVs, power ventilators and attic fans?** Some of these items seem small, but everything adds up.

## REDUCE ENERGY USAGE DURING PEAK HOURS

Peak hours are the busiest time for Raccoon Valley Electric Cooperative (RVEC) since many member-owners are using electricity at the same time. It also costs RVEC more to buy electricity when the demand is high during these peak times, and the cost of your future electricity may also rise. Using less electricity during peak periods saves money.

Here is what you can do to help us help you during peak hours – usually during the hottest summer days between 11 a.m. and 8 p.m.

- **Shift household chores and activities away from peak periods.** For example, wait to run your dishwasher until you go to bed at night.
- **Use the most energy-efficient appliances you have.** Your microwave uses less energy than your stove or cooktop range.
- **If you're buying a new appliance, purchase a high-efficiency one.** Look for ENERGY STAR® labels when you are evaluating.
- **Be aware of your energy consumption.** Try to get in the habit of using energy efficiently all year.

## VIEW YOUR DAILY ELECTRIC USAGE

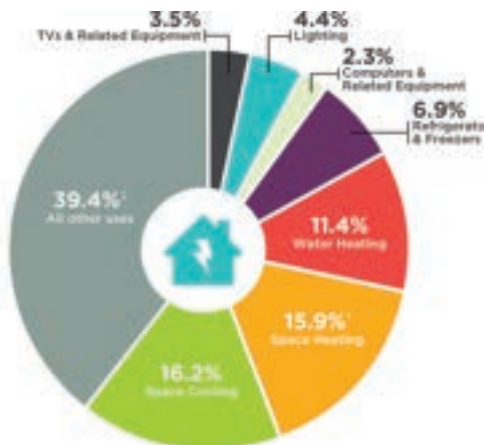

Did you know that you can view your daily electric usage on SmartHub?

SmartHub lets you view and change account information, notify customer service of account inquiries, and make payments in a secure environment from your mobile device, computer or tablet. You can monitor and analyze your electric use at the touch of a button! This service can help you conveniently manage your account for no cost.

Go to [www.rvec.coop](http://www.rvec.coop) and click "Pay My Bill" to register for the service. SmartHub is also available as an app for smartphones and tablets. The app is free and can be downloaded from iTunes or the Android Market.

## HOW AMERICANS USE ELECTRICITY

The latest data from the U.S. Energy Information Administration shows the combined use of clothes washers and dryers, dishwashers, small appliances and other electrical equipment (shown as "all other uses" on the pie chart) accounts for the largest percentage of electricity consumption in American homes.

Source: U.S. Energy Information Administration, 2008

## WATCH CO-OP PROPERTY WHEN BURNING DITCHES

It's the time of the year when many of our member-owners may be burning off the weeds and grass in ditches.

This burning helps clean things up but can also cause problems if a fire is allowed to burn around Raccoon Valley Electric Cooperative (RVEC) poles, anchors, guy assemblies, underground cabinets and other equipment.

Burning close to RVEC property not only can cause a lot of damage but can also be dangerous and cause future electric service problems. Any member-owners involved may be invoiced for damage caused to co-op property.

To avoid damage to RVEC property, future service problems and danger to yourself and others, please watch where you burn.

## BEWARE OF PHANTOM LOADS IN YOUR HOME

You may turn off the TV and power down your computer, but these appliances – and many others – continue to draw electricity, costing you money.

Energy use is multiplied in any appliance with a lit display clock, memory chip or remote control. These include TVs, cable and satellite boxes, microwaves, water coolers, video game players, burglar alarms and more.

According to the Department of Energy, 40% of all electricity used to power home appliances is consumed when the devices are turned off. It's also estimated that these energy "vampires" use 5% of our total electricity and cost U.S. consumers more than \$3 billion annually, according to the Alliance to Save Energy.

### So, what can you do to save money?

- Look for the ENERGY STAR® label on all appliances that you purchase. These appliances may use as much as 50% less energy than other appliances.
- Purchase appliances – such as computers and monitors – that will go to sleep (also called power management or stand-by mode) when not in use.
- Any time you purchase an appliance (such as a microwave) with a continually lighted display or clock, you will pay for the constant-on feature. If you can live without these features, your energy costs will decrease.
- If you keep items in your entertainment center powered through power strips, you can turn off – and back on – all the equipment at once.

## CONNECT WITH RVEC AT THE IOWA STATE FAIR!

The Touchstone Energy® Cooperatives of Iowa are pleased to sponsor the 4-H Exhibits Building at the 2023 Iowa State Fair. Raccoon Valley Electric Cooperative is proud to be a Touchstone Energy member, which means we're part of a nationwide network of locally owned co-ops that provides resources and leverages partnerships to help member-consumers use energy wisely.

If you're planning a visit to the Iowa State Fair from Aug. 10-20, stop by and see us in the air-conditioned 4-H Exhibits Building on the southwest corner of the fairgrounds.

Electric co-op staff from across the state will hand out plastic hard hats and suckers for the kids while supplies last. Kids can also try on some lineworker safety gear and take fun photos in our co-op safety selfie station.

## REPORT POWER OUTAGES

If you do not have power or have an electrical emergency, call

# 712-659-3649

Phones are answered 24/7!

# PROTECT YOURSELF AGAINST UTILITY SCAMS

*"Your electric bill is past due, and we will cut off power to your home in the next hour if you don't pay us over the phone immediately!"*

Have you ever received a threatening call like this from someone claiming to be from your local electric cooperative? Would you know what to do if you received a call like this?

No matter the season, scammers frequently target consumers, and members of Iowa's electric cooperatives are not immune. Phone scammers often appear to be calling from local numbers and claim to be from the local electric cooperative. Sometimes, the calls include prerecorded messages. In almost all the calls, the scammers threaten the innocent person on the other end of the line, demanding immediate payment to prevent disconnection of electric service.

Your local electric co-op will never contact you out of the blue to demand immediate payment or threaten immediate disconnection. If you receive a suspicious call, text or email from someone claiming to be from the co-op, please contact your electric co-op office directly by using the phone number on a recent bill or on the co-op's website to verify the communication. The best

defense against a utility scammer is an educated consumer; follow these tips from Utilities United Against Scams to protect yourself from a potential scam.

## 1 Protect personal information

Never provide or confirm personal information (Social Security number, date of birth) or financial information (banking account information, debit or credit card information) to anyone initiating contact with you and claiming to be from your local electric co-op. Never give out information or provide any payment type to any callers or unexpected individual(s) appearing at your door claiming to represent your co-op. Your local co-op will already have your relevant personal and account information.

## 2 Take your time

Do not be rushed. If you receive a call, text, email or visitor saying you have to pay your bill immediately to avoid disconnection, tell them you would like to verify that they are a legitimate co-op representative by calling a verified number for the local co-op office. Beware if a representative exhibits impatience, annoyance or anger when you question their authority. While a scammer will

discourage you from hanging up and calling the number on your utility bill, a real co-op representative will encourage you to do so for your own peace of mind.

## 3 Always ask questions

Ask the person contacting you to provide you with your account number, your last payment amount, date of payment and their employee identification number. If the individual is a legitimate utility representative, this information will be readily accessible. If not, hang up or shut the door, and call your utility directly to report the suspicious activity.

## 4 Contact your utility directly

If you receive a suspicious call or visit, please contact the local police and your electric co-op immediately. Share details that the scammer told you which might aid in a possible criminal investigation.

For more information on protecting yourself against various scams, visit the Iowa Attorney General's website at [www.iowaattorneygeneral.gov](http://www.iowaattorneygeneral.gov) and click Consumer Tips & Information under the FOR CONSUMERS tab.

# SCOTCHEROOS – AN IOWA DELICACY

BY DARCY DOUGHERTY MAULSBY

One of the highlights of summer events is getting to sample all the tasty, homemade treats at picnics, potlucks, parties and more. Iowans are masters of making these informal meals memorable.

When I attended a local high school graduate's reception in May, I couldn't believe my good fortune. At the end of the buffet line, there was a beautiful sight, sure to warm the heart of an Iowan – a huge tray of homemade scotcheroos, all cut into generous portions.

Since it's important to eat a balanced diet, I put a grilled hamburger on one side of my plate and a big scotcheroo on the other side.

I've been a scotcheroo fan since I was a kid. Well into adulthood, I assumed everyone knew about scotcheroos and loved them. After I published my book "A Culinary History of Iowa," I discovered that a surprising number of non-Iowans have never heard of these delicacies. Say it isn't so! It's hard to imagine life without this incredible concoction of cereal, chocolate, butterscotch and peanut butter that's fun to say (doesn't "scotcheroo" sound like a fancy dog?) and even more fun to create.

## A convenient history

Occasionally, a member of the media asks to interview me about the origins of the famed scotcheroo. At best, the history is unclear. Some reports say the recipe made its first appearance on the side of Rice Krispies® boxes in the mid-1960s, although there's no definitive answer about who invented scotcheroos – or where.

While some food snobs might sneer at something based on convenience foods, let's take a step back to when scotcheroos first hit the culinary scene. I think of the Iowa home cooks I've interviewed through the years, especially those who remember how popular "modern" convenience foods

were in the 1950s, 1960s and 1970s. At that time, processed, time-saving foods were all the rage. Serving these types of foods was a sign you were on the cutting edge. It would have been trendier to bring a plate of scotcheroos to a party than a freshly made rhubarb crisp or apple pie.

Through the years, the Midwest has become the epicenter of scotcheroo enjoyment, and I, for one, am grateful.

Scotcheroos are a riff on Rice Krispies Treats, minus the marshmallows. This connection is a nice touch, since an Iowan helped create Rice Krispies Treats. After Mildred Ghrist Day earned her degree in home economics from Iowa State University, she landed a job with the Kellogg's cereal company. By 1939, Mildred and a co-worker invented what we know today as Rice Krispies Treats.

## Simple goodness that stands apart

Some say scotcheroos are the Cadillac of Rice Krispies Treats. Even though they incorporate a few great twists, including peanut butter, melted

chocolate and butterscotch chips, scotcheroos don't really taste peanut buttery, nor do they taste quite like butterscotch. More than the sum of their parts, scotcheroos are chewy, crispy and downright addictive.

It's no wonder scotcheroo recipes often turn up in Iowa church cookbooks and community cookbooks – the places where people showcase their culinary "A game." These books abound with proven, practical recipes, meaning you can find most ingredients, if not all, at the local grocery store or your kitchen pantry. The simplicity of scotcheroo ingredients is just one more reason to love them.

Next time you need to bring treats to a picnic or potluck, just whip up a batch of scotcheroos. (Hey, I even learned recently that they freeze well if you want to make them ahead of time.) You're sure to be the hit of the party.
